Executive Summary

This document describes the TR290 series of specifications covering the intent common model.

1. Introduction

The intent common model contains the mandatory vocabulary of intent specification. This means that every intent manager must support at least one version of the intent common model.

1.1. Scope

This document introduces the TR290 series of specification documents about focusing on the intent and intent report structure and specification vocabulary of the intent common model.

1.2. Revision overview

This chapter provides a brief overview of the most significant conceptual changes between model versions to illustrate the evolution of intent modeling. An iteration of the major model number indicates revisions with substantial conceptual changes. An iteration of intermediate model number indicates minor additions, while the overall concept of the model are kept. The minor model number iterates if error corrections are needed.

1.2.1. Model version 3

The third major version of the intent common model introduces functions for expressing operators. Functions provide a more intuitive way to express requirements. They also improve precision in the logical expression.

Condition objects are introduced and replace parameters. Conditions are more generic and re-useable in other cases where logical evaluations are needed, for example in context.

1.2.2. Model version 2

The second major version of the intent common model introduces the concept of providing requirements through logical conditions. If and when a condition is evaluated as true, the system is compliant to the requirement. Logical operators allow concatenating conditions for defining the overall logic of overall compliance to an intent.

1.2.3. Model version 1

The version one of the intent common model establishes the basic structure of intent and intent reports. Requirements are provided by means of expectations, which specify goals to be fulfilled. This version also introduces the concepts of context and information as part of the intent specification.

2. Document Overview

The specification of this revision of the intent common model consists of the following documents:

Document	Title	Version	Description
TR290	Intent Common Model	v3.0.0	This document. It provides an overview and common definitions.
TR290A	Intent Common Model - Intent Expression	v.3.0.0	Defining model elements used for expressing intent.
TR290B	Intent Common Model - Intent Reporting	v.3.0.0	Defining model elements used to express intent reports
TR290V	Intent Common Model - Vocabulary Referecne	v3.0.0	Alphabetical list and explanation of all modelling artifacts introduced by the intent common model

3. Administrative Appendix

3.1. Document History

3.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
.0.0	28-May-2021	Alan Pope	Initial Release
1.1.0	26-Nov-2021	Alan Pope	Updated to v1.1.0
2.0.0	31-Mar-2022	Alan Pope	Updated and changed to TR290
2.1.0	01-Jun-2022	Alan Pope	Updated to beta
3.0.0	07-Feb-2023	Alan Pope	Final edits prior to publication

3.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	01-Jun-2022	Alan Pope	Final edits prior to publication
Pre-production	04-Jul-2022	Adrienne Walcott	Updated to reflect TM Forum Member Evaluated status
Pre-production	07-Feb-2023	Alan Pope	Updated to version 3.0.0
Pre-production	17-Mar-2023	Adrienne Walcott	Updated to Member Evaluated status

3.2. Acknowledgments

3.2.1. Guide Lead & Author

Member	Title	Company
Jörg Niemöller	Expert of Analytics and Customer Experience	Ericsson

3.2.2. Main Contributors

Member	Title	Company
Jörg Niemöller	Expert of Analytics and Customer Experience	Ericsson
Kevin McDonnell	Senior Director, Intelligent Automation	Huawei
Yuval Stein	AVP Technologies	TEOCO

3.2.3. Additional Inputs

Member	Title	Company
Aaron Boasman-Patel	Vice President, AI, Labs and Innovation	TM Forum
Dave Milham	Chief Architect	TM Forum
Alan Pope	Collaboration Manager	TM Forum
